ICT ENABLED TEACHING- LEARNING

AUDIO VIDEO PRESENTATION SESSION CONDUCTED IN THE CLASSROOM

Audio-visual presentations are an effective teaching tool for architecture, as they can provide several benefits, including:

1. Improved understanding: Architecture can be a complex subject, and audio-visual presentations can help students understand complex concepts by illustrating them with visual aids such as photographs, diagrams, and videos.
2. Increased engagement: Audio-visual presentations can engage students and keep them interested in the material being presented. By incorporating multimedia content, students are more likely to remain attentive and retain information.
3. Greater retention of information: Studies have shown that using audio-visual aids in teaching can enhance long-term memory retention. Audio-visual presentations are an effective way to reinforce key concepts and help students remember them over time.
4. Enhanced creativity: Audio-visual presentations can inspire students to think creatively about design and architecture. By presenting real-life examples of successful designs, students can gain insights into effective design strategies and techniques.
5. Improved communication skills: Audio-visual presentations can help students develop their communication skills, including public speaking and presenting ideas effectively. These skills can be useful in future careers in architecture or other fields.

SEMINARS AND WEBINARS HELD ONLINE THROUGH ZOOM

Seminars and webinars are an essential component of architectural education, as they provide students with numerous benefits that enhance their learning experience. They play a crucial role in the education of architecture students. They provide students with exposure to current industry trends, professional networking opportunities, an enhanced learning experience, access to specialized knowledge, and preparation for professional practice.

A.B.C.A regularly conducts seminars for academic semesters as per the subject requirements. In pandemic years , webinars were held so that students should always be connected to the architectural industry. The institute feels students should always be aware of the industry .

WEBINAR /SEMINAR REPORT:

Academic Year: 2021-22
Year: all years
Speaker : Ar.Ajaykumar Thakur , Ar. Karansingh Thakur, Aurangabad
Topic :- design of Bus Terminal
Organized by A.B.C.A. ,Sangli
Co-ordinating Faculty- design team

ARCHITECT|URBAN DESIGNER|INTERIOR DESIGNER

DATE :21.03.2022 TIME : 12.00pm TO 2.00pm

ALUMINI MOVIE CLUB

A.B.C.A. Alumni has formed a movie club. This movie club plans showcasing movies based on the architect's life and his works. These movies are shown to the students in A.B.C.A. Smart class. After the session an interaction and discussion session is held in the class, where students discuss the works shown in the movie. This helps them to understand the philosophy of different architects, analyses the works and the design approach of the architects.

	Students watching Charles chorea movie.
	
	 discussion session after of the movie .
